### Strike Force - Truck Wash

Offering the finest in caustic free high gloss cleaning detergents, Strike Force is becoming a contractor favorite. Strike force is loaded with detergents that are among the most effective alkaline substances for the emulsification of oils and greases. In addition Strike Force is loaded with corrosion inhibitors to help prevent pitting and corrosion on stainless steel, aluminum and other soft metals.

With the addition of special wetting agents and high grade surfactants we are able to create a strong foaming detergent that will decrease the surface tension of water. Our unique blend enables the detergent solution to better penetrate the soils and lift them off the surfaces being cleaned. Coupled with our unique rinse agents Strike Force offers the commercial contractor a super concentrated cleaner with superior foaming and rinsing that leaves your equipment clean with an unmistakable shine.

Part #	Description	Price	SALE
SF55	55 Gallon Drum Kit-Concentrate	\$109.95	<b>\$98.95</b>
SF10	10 Gallon Drum Kit-Concentrate	\$33.95	<b>\$28.95</b>

Dilutions will vary but one drum kit will typically make 3-4 drums of ready to use downstream mix. Surface concentrations of 40-1 to 100-1.

### Blue Voodoo - House Wash

Providing the perfect combination in bleach stable detergents took a magical combination of surfactants, softening agents, shine enhancers and mildew release agents. When coupled with the highest grade bleach stable surfactant we have created a product that puts a spell on the dirt and mildew releasing it from the house like magic. Blue Voodoo is a product that can be used with or without bleach and is designed to help lift and release the pollutants and mildew from the substrate and suspend them in solution for easy rinsing from the surface.

In situations where heavy mildew is present the use of bleach offers a sanitizing and mildew killing action that detergents alone cannot provide, however bleach alone is not a good cleaner. When mixed with Blue Voodoo you will get the best of both worlds, clean the pollutants and kill and release the mildew in one application. With our special softening and chelating agents you are able to rinse in a single pass and leave behind a shine that will make your customers think you were using voodoo!

### Hood Master -Hood Cleaner

With extensive testing and careful chemistry we have created one of the industry's strongest non-caustic blended hood cleaners. With excellent foaming, wetting and clinging characteristics Hood Master is a degreaser that is tough to beat on any level.

Our goal was to create a product that will clean as well as the hottest hydroxide based cleaners but not burn your skin or remove your hair in the process. Hood Master is known for its penetrating properties and grease melting abilities. Hood Master is quickly becoming the first choice professionals who understand the disadvantages of hydroxide based cleaners. Our special blend of surfactants coupled with grease dissolving and emulsifying agents will break through the thickest grease buildup.

### Crete Kleen

Crete Kleen is formulated specifically for the cleaning of unfinished concrete surfaces. This custom blended non-caustic formula is designed to be more user friendly than the acids or caustics that are typically used in concrete cleaning. The unique blend of high grade surfactants, emulsifying agents and concrete brightening agents allows the product to aggressively lift and release the oils, grease and other pollutants from the surface. Crete Kleen contains exclusive solution stabilizers that are able to maintain the pollutants in solution for ease in rinsing and to prevent the redeposition on the surface. This special blend of heavy duty degreasers has made Crete Kleen the first choice for concrete cleaning contractors around the country.

Dilutions will vary. One drum kit will make approximately 1-3 drums of ready to use downstream mix. Surface concentrations of 20-1 to 60-1. Drum kit makes 55 gallons of super concentrate.
